Environment: maximise the positive and minimise the negative impact on nature and environment

Actions and plans to further reduce CO₂-emissions

- Renewable energy is obtained via solar panels and via aquifer storage and recovery (recover the thermal differences from summertime cooling for winter time heating). The remaining part consists of zero emission Danish wind energy
- In September 2019, a.s.r. shut down the use of natural gas
- Mobility plan to further decrease the CO₂-emissions:
 - Free public transportation business card available for all employees
 - Subsidize employees with a bicycle plan
 - Use of electric shared cars for employees
 - Replacement of the car lease fleet to electric cars
- Additional solar panels to be installed on the roof of the parking garage

a.s.r.'s headoffice is one of the most sustainable in the Netherlands

- During the renovation (2013-2015), the demolition produced (23,000 tonnes) was for 98% reused
- Renewed head office has become 50% more energy-efficient than before

- a.s.r.'s head office, 91,912 square meters, is one of the most sustainable office buildings in the Netherlands with an energy label of A++

a.s.r. is an active participant in society

Social: be a socially relevant insurance company that helps by taking action

• Employee contribution to local society, e.g. via financial self-reliance:

- Promoting the financial education of children and young people
- Provide support to households with problematic debts
